Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references (specifically, the document mentioned in page 34, line 13) have been cited by the examiner on form PTO-892, they have not been considered.

Specification

The disclosure is objected to because of the following informalities:

In page 23, line 18, the term "senor chip" should be replaced with --sensor chip--.

In page 23, line 19, the term "silicone sensor" should be replaced with --silicon sensor--.

In page 32, line 15, the term "when a two sets" should be replaced with --when two sets--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the stimuable phosphor sheet" in line 2, and the limitation "the stimulated emission" in line 3. There is insufficient antecedent basis for these limitations in the claim.

In claim 3, last three lines, the term "is positioned ...the stimuable phosphor sheet" is unclear.

Claim 12 is unclear. For example, the relationship between the boundaries and the detecting means is unclear. Note that claim 12 has not been further treated on merits.

Allowable Subject Matter

Claims 1-2 and 4-11 are allowed.

Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The inclusion in claim 1 of limitations that an image read-out apparatus comprises an array of alternating first and second types of optical elements, and first and second sensors which receive light from the first and second types of optical elements, respectively, is considered a nonobvious modification of the device of Schiebel.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schiebel, U. S. Patent No. 4,953,038 describes an image read-out apparatus comprising an optical element array (8 and 8', col. 3, lines 15-25). Yasuda, U. S. Patent Application Publication 2001/0011714 describes an image read-out apparatus comprising projecting means (21-24, paragraphs [0039]-[0043]) which project reading light in a line-like pattern, a line sensor (20, fig. 1, paragraph [0038]), sub-scanning means (claim 1, last four lines), and an optical array of alternately arranged first and second optical elements (fig. 7, paragraphs [0048]-[0049]).
